Spirax Sarco Condensate Recovery Units Components

Thank you for downloading the Spirax Sarco CondensateRecoveryUnits components. This download includes;

- CRU200-2D-CM33-CS
- CRU200-2D-CM33-SS
- CRU200-2D-CM34-CS
- CRU200-2D-CM34-SS
- CRU200-4D-CM101-CS
- CRU200-4D-CM101-SS
- CRU200-4D-CM102-SS
- CRU200-4D-CM103-CS
- CRU200-4D-CM103-SS
- CRU500-4D-CM101-CS
- CRU500-4D-CM101-SS
- CRU500-4D-CM102-CS
- CRU500-4D-CM102-SS
- CRU500-4D-CM103-CS
- CRU500-4D-CM103-SS
- CRU500-5D-CM151-CS
- CRU500-5D-CM151-SS
- CRU500-5D-CM152-CS
- CRU500-5D-CM152-SS

Loading the component into your project

The Spirax Sarco Condensate Recovery Unit are modelled as mechanical equipment families that can be simply loaded in to your project. This can be done using the following method:

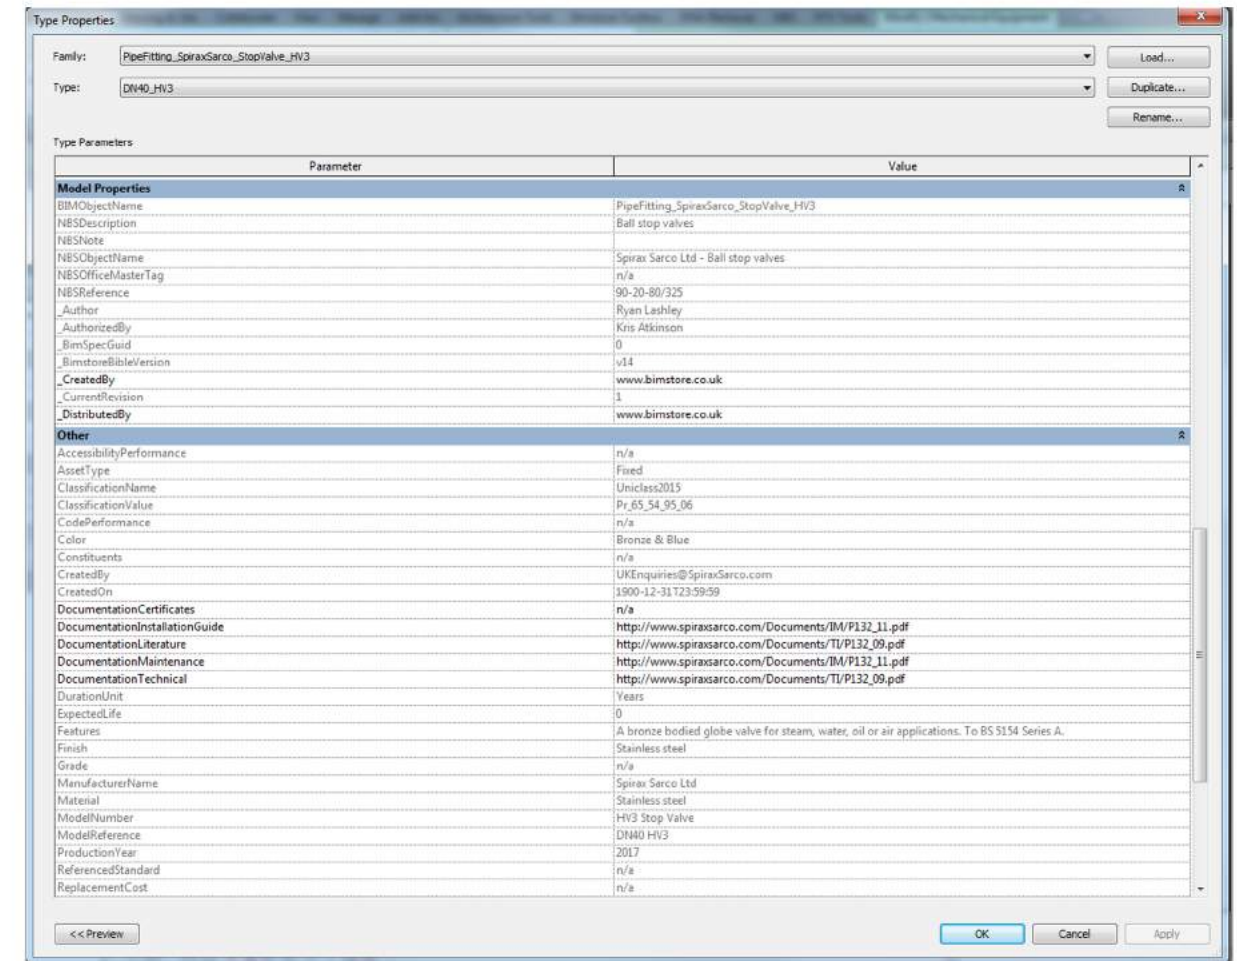

1. Open your Revit project file (.rvt), and navigate to a floor plan view.
2. Now open the required component (.rfa) you have just downloaded from bimstore. Use the Revit ribbon at the top of the screen to navigate to the 'family editor' and click the 'Load into Project' button.

3. The component can now be placed in your project and can also be selected from the 'components' drop down on the main Revit ribbon.

Spirax Sarco Manufacturer Specific Data

The Spirax Sarco Condensate Recovery Unit contain a host of technical and manufacturer specific data to assist the user when building up their project or when scheduling the pumps. To access the data embedded in the pumps, simply select the component and click 'Edit Type' button at the head of the 'Properties' tab. The majority of this information can be scheduled including URL links to the Spirax Sarco website and product documentation web pages, as well as product specific technical data and COBie parameters (found under the 'Other' parameter group heading).

Other Notes

You can add the components to your company template file, they will then be available without loading when starting a new project.
